

## **Portable Wireless Security** **For Construction Sites**

SiteStat is a portable, wireless remote security system designed to provide theft protection at remote sites. SiteStat allows you to directly monitor the remote site from your mobile phone. No long term contracts or monitoring services are required. The innovative, easy to use setup procedure means SiteStat can be up and running at a new site, in just minutes.

SiteStat helps reduce operating costs by reducing or preventing losses due to theft and vandalism

Originally developed to secure residential building sites from theft of appliances and building materials, SiteStat has been adapted to monitor practically any premises, including tool sheds, equipment trailers, boats, motorhomes, self-storage units, tool cribs, and more. Optional GPS tracking allows location monitoring of mobile assets.

SiteStat consists of a central monitoring panel, supplied by 110v or battery-only power. The base package provides (4) wireless motion sensors, and a prepaid cellular network interface. No wiring is required, just plug in the power connection, and mount the wireless motion sensors. SiteStat is very easy to install, and to move from job site to site.

SiteStat is provided as a managed service, since many companies find it cost effective to use our existing infrastructure and wireless cellular network on a subscription basis. You may purchase your own equipment, or rent/lease SiteStat on a short or long term basis. We manage the infrastructure end-to-end, while you pay only for the valuable business benefits received, with minimal capital investment.

Visit our website for more information on SiteStat, and other remote monitoring products for business and industrial applications.

- Receive alerts directly on your mobile phone, wherever you have coverage
- Manage the system remotely from your mobile phone, No need to be onsite to arm or disarm the system
- No Phone line required
- Prepaid cellular plan included with unit
- Rugged design resists abuse and transport to different jobsites.
- You may qualify for an insurance discount
- Optional central monitoring service and web-based reporting
- Optional GPS tracking for mobile assets

**SiteStat versus Traditional Security Alarm**

	SiteStat	Traditional
<b>Initial Setup</b>	Very simple, single phone call	Complex, manual setup with keypad
<b>Phone Line</b>	None required, prepaid cellular included	Requires phone line installation
<b>Mode of use</b>	Remote Operation from Cell Phone	Local, at keypad
<b>Relocation</b>	Very simple, wireless, no reconfiguration needed	Requires installation and phone line
<b>Central Monitoring</b>	Optional	Required
<b>Short Term Use</b>	Rental Units by month	Long Term Contract Required

*Our mission is to offer a security solution to the construction market that will not only lower contractors' operating costs by reducing after-hours theft and vandalism, but will feature easy setup and operation, will work directly with users' mobile devices offering greatest ease-of-use, and will have a lower total cost of ownership than alternative solutions. – Art Felgate, Founder of Portable Security Systems, LLC.*

**Industry Facts**

Theft and construction site vandalism throughout the nation total more than \$1billion annually. A Department of Justice study reports the average construction site loss at \$750 per incident. A majority of job sites experience up to 5 loss incidents per year. Residential job site losses account for a 1-2% increase in the cost of a new home. Replacing items stolen from a jobsite causes lost time and productivity, adding significant costs to operations.

**Lease/Rental Units**

SiteStat units are available for short term rental or longer term lease. Optional web-based reporting service is available on a subscription basis. Permanent mount models are also available for fixed installations.

**Ordering Information**

SiteStat is configured for your specific monitoring needs ranging from a basic portable jobsite kit to more advanced systems with GPS tracking capability. Call your FactoryNOW sales representative today for more information or to see a demonstration of SiteStat.
